BetaPro Inverse Bitcoin ETF (BITI(C$)/BITI.U(US$)) - ETF Shares
Manager: Global X Investments Canada Inc.

This document contains key information you should know about BetaPro Inverse Bitcoin ETF. You can find more details about this exchange traded fund (ETF) in its prospectus. Ask your representative for a copy, contact Global X Investments Canada Inc. at info@globalx.ca or 1-866-641-5739, or visit www.globalx.ca.

Before you invest, consider how the ETF would work with your other investments and your tolerance for risk.

This ETF is an alternative mutual fund within the meaning of National Instrument 81-102 Investment Funds ("NI 81-102"), and is permitted to use strategies generally prohibited by conventional mutual funds, including with respect to the use of specified derivatives, the ability to employ leverage and borrow cash. While these strategies will only be used in accordance with the investment objectives and strategies of the ETF, during certain market conditions they may accelerate the risk that an investment in ETF Shares decreases in value.

The ETF is not a conventional investment and is very different from other Canadian exchange traded funds. The ETF is designed to provide daily investment results that endeavour to correspond to up to one times (100%) the inverse of the daily performance of the underlying index. The underlying index tracks bitcoin futures and is highly volatile. As a result, the ETF should not be viewed as a stand-alone long term investment. The leverage ratio employed by the ETF will be posted on the manager's website at globalx.ca and any changes to the leverage ratio will be disclosed by way of public announcement.

Given the speculative nature of bitcoin and the volatility of the bitcoin markets, there is considerable risk that the ETF will not be able to meet its investment objectives. An investment in the ETF is not intended as a complete investment program and is appropriate only for investors who have the capacity to absorb a loss of some or all of their investment. An investment in the ETF is considered speculative and high risk. It is intended for use in daily or short-term trading strategies by sophisticated investors. The deviation of the ETF's returns from the inverse performance of its underlying index can be expected to become more pronounced as the volatility of the underlying index, and/or the period of time, increases. Any losses may be compounded.

There are inherent risks associated with products linked to crypto-assets, including bitcoin futures. While bitcoin futures are traded on a regulated exchange and cleared by regulated central counterparties, exposure to the high level of risk of bitcoin futures will not be suitable for all types of investors. An investor should only consider an investment in the ETF if he or she understands all of the risks of investing in an ETF exposed to bitcoin futures. Investors should monitor their investment in the ETF daily.

Quick facts

Date ETF started:	April 15, 2021	**Fund manager:**	Global X Investments Canada Inc.

What does the ETF invest in?

The ETF is designed to provide daily investment results, before fees, expenses, distributions, brokerage commissions and other transaction costs that endeavour to correspond to up to one-times (100%) the inverse (opposite) of the daily performance of an index that replicates the returns generated over time through long notional investments in Bitcoin Futures. The current Underlying Index of the ETF is the Horizons Bitcoin Front Month Rolling Futures Index (Excess Return). The ETF does not seek to achieve its stated investment objective over a period of time greater than one day.

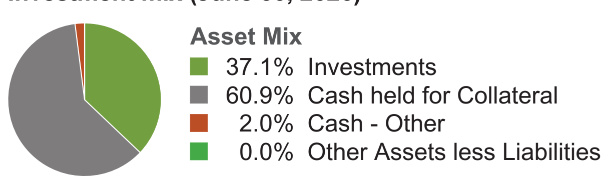
Top 10 investments (June 30, 2026)

1. Cash held for Collateral	60.9%
2. Forward Agreements	37.1%
3. Cash - Other	2.0%
Total percentage of top 3 investments	**100.0%**
Total number of investments: 2	

Investment mix (June 30, 2026)



How risky is it?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating
Global X Investments Canada Inc. has rated the volatility of this ETF as **High**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

Low	Low to Medium	Medium	Medium to High	High

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees
ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

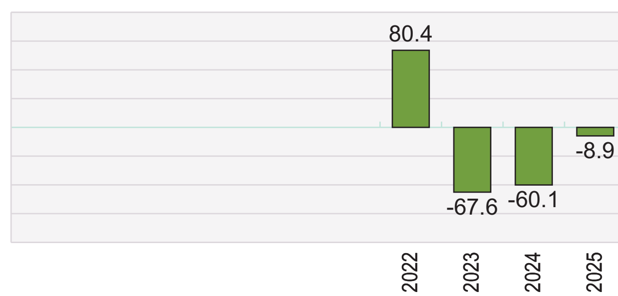
This section tells you how shares of the ETF have performed over the past 4 years.

Returns[1] are after expenses have been deducted. These expenses reduce the ETF's returns.
[1] Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how shares of the ETF performed in each of the past 4 completed calendar years. The ETF dropped in value in 3 of the 4 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.



Best and worst 3-month returns

This table shows the best and worst returns for shares of the ETF in a 3-month period over the past 4 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested $1,000 at the beginning of the period
Best return	117.0%	June 30, 2022	Your investment would rise to $2,170
Worst return	-48.1%	March 31, 2023	Your investment would drop to $519

Average return

As at June 30, 2026, a person who invested $1,000 in the ETF at inception now has $270. This works out to an annual compound return of -22.2%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.

- The bid is the highest price a buyer is willing to pay if you want to sell your ETF shares. The ask is the lowest price a seller is willing to accept if you want to buy ETF shares. The difference between the two is called the **"bid-ask spread"**.
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell shares at the current market price. A limit order lets you set the price at which you are willing to buy or sell shares.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- Suitable for investors who are willing to invest in highly speculative investments
- Suitable for investors looking to make short term investments
- Suitable for investors who are comfortable with a high degree of risk.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell shares of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell shares of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don’t pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2025, the ETF's expenses were 5.10% of its value. This equals $51.00 for every $1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	2.05%
Trading expense ratio (TER) These are the ETF’s trading costs.	3.05%
ETF expenses	**5.10%**

Trailing commission
The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn’t have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.
